pg 19

Single Flush

Single flush toilets only have one flush mechanism – meaning that all types of waste are flushed with the same amount of water

Dual Flush

Dual flush toilets have two flushing modes – the half flush and the full flush. They use much less water and are considered to be environmentally friendly

S Trap

The term S trap indicates that the outlet (waste) pipe goes through the floor

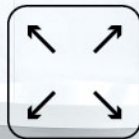

P Trap

The term P trap indicates that the outlet (waste) pipe goes through the wall

Tap Hole Ø

Standard taps and spouts generally require a hole of at least 28mm in diameter

Measurement

Whether in private or in public spaces, bathrooms are essential to our lives and deeply cherished should they fulfill our expectations both functionally and aesthetically.

Since 1992, Saniton has dedicated our business to offering a wide range of sanitary ware that echoes our philosophy of upholding product quality, design, environmental sustainability and affordability.

Borne from our passion for pottery and porcelain creations, our ceramic products are made from high quality natural raw materials that are sourced from all over the world. Our commitment to quality has thus earned us the coveted ISO 9001 certification.

We engage the best craftsmen in the field to design our products that continue to reflect the tastes of the times. As a result, our products have graced homes, offices, shopping malls and hotels throughout South East Asia.

With water being a finite and precious commodity, Saniton products put water conservation at the forefront. Through constant innovation, our sanitary ware has evolved and improved, and are now held in high esteem for their water saving and efficiency features.

Bathrooms are integral to living. We need them and look forward to stepping into one that is comfortable, beautiful and works every time and any time. With this in mind, Saniton commits to continually move with the times and make our products the first choice of families, businesses and governments.

WATER CLOSET

Easy on the eye and just as easy to use, Saniton water closets come in many shapes and sizes. To suit various needs and preferences, we have back-to-wall, close-coupled, one-piece and wall-hung designs for our pedestal water closets.

HPKV ST2205

2x faster flow rate

Retrofit capable

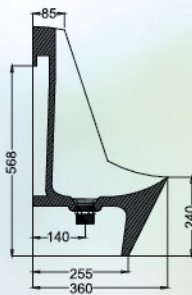

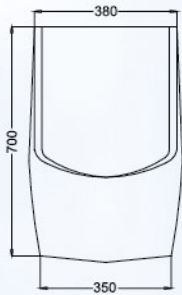

Easy install easy maintenance

More robust technology

L 360mm
W 380mm
H 700mm

Our **High Performance Key-Valve®** is the heart and soul of Falcon's Waterfree Urinals, providing safe, long-lasting, low-odor performance. Falcon waterfree urinals save up to **151,000 liters** of water yearly per urinal and reduce your cost of fresh water supply. Since the introduction of the Key-Valve® technology, there has been many improvements incorporated into our design that set our cartridges apart from the rest. Our latest design follows that same path and includes new patent-pending features to provide the best sealing and flow performance ever for our customers.

Significant Reduction in CO₂ Footprint

Cues you when to replace

Our patented Key-Ring® technology dissolves with use, providing a visual signal that helps you know when your cartridge needs to be changed, making maintenance easier.

High Volume, High Velocity Technology

That Converts to Waterfree & Low-Flush Systems

Competitors

High-Performance Key-Valve®(HPKV®)

The New & Improved High Performance Key-Valve LAVANO Waterfree Urinal

URINAL

2X Faster Flow Rate

Our High Performance Key-Valve® technology provides more than twice the flow rate of competitors and previous models.

Retrofit Capable

Our High Performance Key-Valve® features a drastically faster flow capacity, creating a better user experience and allowing the valve to be used in urinals that flush on a timed basis without overflowing.

More Robust Technology

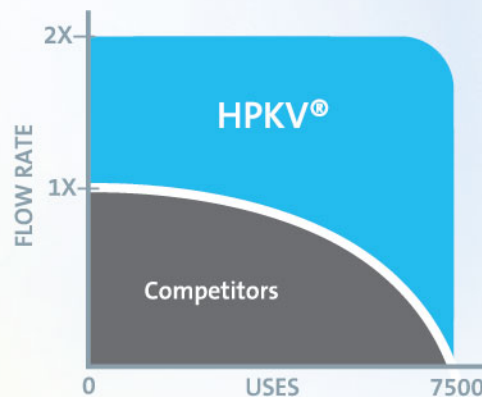

Our patent-pending Bell Valve provides optimal performance for the duration of valve life span-resulting in better long term functionality for our customers.

Competitors

- Slower flow rate
- Good user experience
- Flow rate degradation with use

High-Performance Key-Valve®(HPKV®)

- High volume, high velocity, technology
- More than 2 times faster flow rate
- Excellent user experience
- Converts flush urinals to low-flush systems
- Minimal flow rate degradation with use
- Significant reduction of CO₂ footprint

More Robust Technology Optimal Performance Throughout Life

Our patent-pending Bell Valve provides optimal performance for the duration of valve life span-resulting in better long term functionality for our customers.

A close-up photograph of a person's hands being washed with white soap suds in a bathroom sink. The background is a blurred view of a modern bathroom with a chrome faucet. The entire scene is framed by a thin teal border.

BASIN

Every modern bathroom should be adorned with an elegant basin that not only works perfectly but looks good too. Saniton offers a wide range of console, countertop, semi-recessed, under-counter and wall-hung basins to suit different needs and tastes.

The background features several translucent, multi-colored bubbles in shades of blue, green, and purple. A large, prominent sphere is positioned in the upper right quadrant, partially cut off by the edge of the frame. Other smaller bubbles are scattered throughout the white space, creating a clean and modern aesthetic.
